

PROJECT OPEN HOUSE – MARCH 22, 2011

SOUTH GREELEY HIGHWAY CORRIDOR CONCEPTUAL PLAN

The South Greeley Highway Corridor planning project will help determine what transportation safety principles and infrastructure solutions would be appropriate in the corridor, the locations of these solutions, and what level of aesthetic enhancements are desired and applicable. The project study area includes the portion of the South Greeley Highway between I-80 and Terry Ranch Road and extends from Walterscheid Boulevard to Avenue C.

The project seeks to create a shared vision for the South Greeley Highway Corridor that sets the stage for multimodal transportation safety and efficiency, beautification, and economic development. The project will address:

- Public Input and involvement
- Needs of all roadway users, including motorized and non-motorized travel modes
- Providing a street network that supports existing and future land uses
- Enhancing safe and efficient vehicular access to corridor properties
- Identifying possible sources of funding for future improvements
- Prioritization of future projects
- Aesthetic enhancements

Because this is a State Highway, there will be substantial collaboration with WYDOT, Laramie County, other local agencies and the public, to establish policies for future development. Public and stakeholder involvement will be crucial to the corridor recommendations. We hope to see you again at future public meetings.
