NARRATIVE

The Cheyenne Business Parkway (CBP) encompasses a total of 410 acres immediately east of downtown Cheyenne and within city limits. The project area contains some of the highest traffic volumes in the city, with mixed-use development along the east side of the parkway.

General

The Cheyenne Business Parkway (CBP) project is a Public Improvement Project (PIP) being sponsored by the City of Cheyenne. The CBP project includes a series of streetscape improvements that will be implemented over several phases. These improvements are designed to enhance the aesthetic and functionality of the parkway.

The project is focused on improving the streetscape and pedestrian experience along the CBP. Key elements of the project include:

1. Pedestrian Improvements
2. Bicycle Improvements
3. Traffic Calming
4. Landscape Enhancements

These improvements are intended to create a safer and more inviting environment for both pedestrians and vehicles.

The project is currently at a preliminary design stage, with construction anticipated to begin in 2023. The project team is working closely with stakeholders to ensure that the final design meets the needs of the community.

CONCLUSION

The Cheyenne Business Parkway (CBP) project is an important step in improving the quality of life for residents and visitors alike.
